

Occupational Health & Safety Training Courses

Providing your employees with an awareness of your organization's occupational health and safety (OH&S) policies and procedures, and ensuring they have the technical knowledge and skills to perform their duties safely, are critical components of any company's OH&S management system. An organization's expectations for OH&S performance must be established and communicate through clear instruction and training.

Pinchin has been providing successful OH&S training for over 25 years. We offer flexible, workplace-specific courses for all levels of your organization, not only to meet your regulatory obligations, but also to assist you in communicating your company's OH&S commitment and performance objectives. All courses are delivered by experienced and qualified trainers, including Canadian Registered Safety Professionals (CRSP), Registered Occupational Hygienists (ROH) and Certified Industrial Hygienists (CIH).

Flexibility

Pinchin staff is available 24 hours a day, seven days a week, to help you meet your training objectives on time and cost-effectively.

Workplace-Specific Training

Pinchin specializes in workplace-specific training. Our consultants are available to conduct pre-training needs assessments of your workplace and assist in the development of written programs and procedures, when required. This information is incorporated into the training materials to ensure that our courses are truly workplace-specific.

Train-the-Trainer

Pinchin is also available to deliver train-the-trainer sessions on all topics.

Course Duration

Course durations vary depending on the topic and the needs of the attendees. Durations range from 1-hour awareness sessions to 3-day intensive courses. Pinchin's staff work with the client during a pre-training meeting to determine the most appropriate program.

Pinchin Packages

Have a need for a number of training courses? Bundle them together and save! Our OH&S staff would be pleased to meet with you to discuss your training needs and are available to assist you in conducting a Training Needs Assessment.
